

Market and Services Update

MERJ Trading Hours

MERJ has extended its trading hours to 10h00 - 06h00 (t+1) Seychelles time (GMT +4). This is in line with MERJ's vision of being a global marketplace and fits into the tokenization role out program. The markets will now be open during US and European working hours.

PKF will however only be able to assist clients wishing to trade during our office hours. As a reminder our office hours are from 08h30 to 16h30 weekdays.

Should you wish to trade outside of the PKF office hours you can use your client log in to place trades on the system. For further information in this respect, please contact PKF Support (support@pkf.sc).

PKF Nominee

Until recently all PKF clients making use of our nominee services have done so via our nominee account in the name of PKF Capital at the exchange. Although this is accepted practice in many markets around the world, it is not the best way of doing so as ultimately clients with investments in that account are facing PKF Capital for risk.

We are pleased to inform you that PKF Capital has established a separate, exchange approved nominee company that now holds all investments on behalf of our clients. This is a ringfenced company with legislative limitations built into its founding documents dictating that it cannot incur debt outside of obligations relating to investments held on behalf of clients and cannot incur expenses, as all expenses must be carried by PKF Capital.
